

# 5 Reasons I like to use an INFOGRAPHIC

By Lorrin Palagi

1

## To increase engagement:

Infographics are more engaging than text-based content. I like to use visual elements such as images, charts, and graphics to grab the viewer's attention.

2

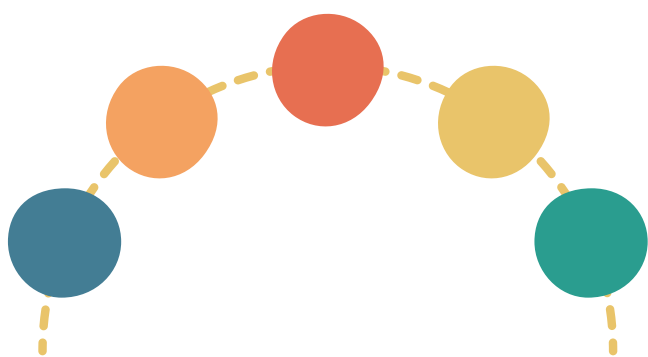

## To simplify complex information:

Complex data can be hard to digest. Infographics help present information in a clear, concise, and easy-to-understand format.

3

## To increase brand awareness:

I use Infographics to put companies in a better light. Infographics increase brand awareness and showcase a company's expertise in a specific field.

4

## To explain a process:

Processes can be complex and confusing. Infographics can be used to help me explain a process or procedure in a clear and simple manner.

5

## To make data more accessible:

It's easier to explain information and data with Infographics. Data becomes much more accessible to a wider audience by presenting it in a visual format.
